

Circle Patterns for Flowers

c. Meryl Ann Butler www.OceanViewArts.com

This page of templates is for flowers. Most of our flowers are made from 1-inch circles, but you may want to experiment with slightly larger or smaller circles.

Print on either colored paper (Astrobrights recommended) or card stock (or try both so you can experiment - some flowers work better with paper and some work better with card stock.)

This page is provided for participants who don't have a 1-inch diameter circle punch. HOWEVER, if you happen to have a 1-inch diameter punch, it's much quicker to just punch out your circles from blank colored papers than to print these and cut them out with scissors.

The most popular flowers for Day of the Dead are Marigolds in shades of orange, yellow and red, but any bright colors are appropriate.

You can save time in the workshop if you already have 30 or 40 1-inch circles cut out in different colors, either by printing this page onto colors of Astrobright **paper or card stock** or punching them out with a circle paper punch.
